FOR IMMEDIATE RELEASE:

STATKING Expands Electronic Data Capture Support

Cincinnati, OH – February 10, 2010 – STATKING Consulting, Inc., a provider of clinical trials services, has announced expanded technical support for clinical trials involving electronic data capture. STATKING now offers weekend support to clinical study sites using STATKING's EDC software TrialMaster®. STATKING data management personnel routinely field questions during weekday hours on data entry and data quality issues from site coordinators and clinical study monitors on clinical trials for which STATKING is providing clinical data management support but with trials unfolding in multiple time zones this support has been increased to include weekend hours. STATKING data management personnel are trained to assist Client sites on data query, enrollment and subject close out issues in all types of EDC trials.

About STATKING Consulting, Inc.

Since 1989, STATKING Consulting, Inc. has provided clinical trial services (biostatistics, clinical data management, clinical study monitoring, medical writing, safety reporting, project management and clinical trial management) for clinical trials for the regulatory approval of novel drug and medical device products. The company is headquartered in Fairfield, OH. The company has provided support on over 250 clinical trials in a variety of drug and medical device therapeutic areas.
